

Crona Care

The same functionality as Crona Safe Zone alarm strip but with accidental knock resistance

Crona Care is easy to press and activate but has a specially designed, reinforced insert strip to prevent accidental knocks setting off the alarm.

Crona Safe Zone

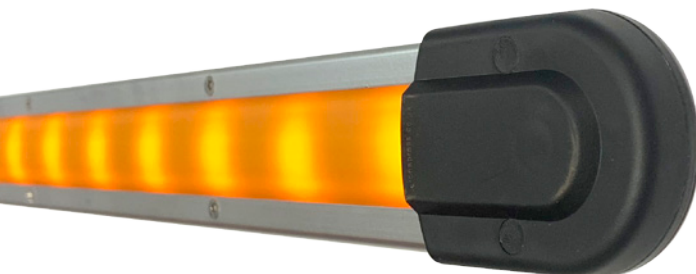

Crona Care
with reinforced walls

- Reinforced insert strip prevents accidental activation
- Wheelchair friendly
- Anti-tamper / Anti-vandalism construction and installation
- Anti-microbial treatment - to contact surfaces as standard
- High strength materials throughout with stainless steel reinforcement to end caps
- All parts designed to be cut on site to aid complex installation situations and avoid drawing errors
- Installation time minimised by fitting one long strip as against wiring of individual alarm buttons
- Can utilise existing systems to save costs

Crona Care Anti-Lig

For special areas where people need protection from themselves

All the features of Crona Care but with enhanced performance:-

- Tested anti-ligature construction
- Ultimate Anti-tamper / Anti-vandalism construction and installation using an advanced fault management system
- Extra Torx clamping screws to captivate insert strip

Multiple options available to all Crona Care variations:-

- IP67 standard sealing, including LED
- Stand-alone or linkable
