

Safe-zone System Components

The Crona Safe-zone System has been designed to be installed and maintained with minimal component parts, simple methods with maximum flexibility

Safe-zone Base Strip	Available in lengths of up to 15m	
Bright Aluminium		
Satin Aluminium		
Black Aluminium		

Safe-zone Insert Strip	
Available in blue, red, green and yellow	
Shown with LEDs fitted	

End Cap		
Wired or unwired		
Universal Connector		

LED Strip		
Available separately		

PCB controller for single zone, 12v 2amp rated:	
Monitors for 1.2k end of line resistor and then outputs LED circuit. On failure to see EOL, outputs fault and extinguishes LED circuit. On strip activation outputs alarm and pulses LED circuit. Reset required.	

Your application will be unique so please get in touch and we will help to put together the appropriate system.
